PROFILE

Flutter Developer with 1+ years of experience building mobile apps using Flutter and Dart. Flexible, adaptable, and able to work effectively in any environment, with any team, and across project needs changing.

WORK EXPERIENCE

Almasader Alraqmia

Mansoura, Egypt

Flutter developer

Feb 2026 - Present

- Implemented **CI/CD pipelines** to automate build and deployment processes
- Collaborated with team members to develop features in parallel and maintain version control consistency
- Leveraged AI tools to accelerate development, debugging, and problem-solving
- Tracked development progress using **ClickUp**, including task updates, bug tracking, and status reporting
- Implemented **multi-environment configurations (flavors)** for better build and release management
- Contributed to **modular app architecture using Clean Architecture + Cubit**, improving code maintainability
- Migrated a native application to Flutter, rebuilding UI and core features
- Published and maintained apps on Google Play Store

Growfet

Mansoura, Egypt

Flutter developer internship

Apr 2025 - Feb 2026

- Built reusable UI components to improve **development speed and consistency**
- Debugged issues and optimized app performance to ensure smooth user experience
- Selected appropriate architecture based on project size (avoiding over-engineering for small apps)
- Conducted code reviews for teammates, ensuring UI consistency and correct app behavior
- Collaborated with QA testers by analyzing bug reports and tracking task/bug status to ensure timely fixes

PROJECT EXPERIENCE

Almasader Alraqmia

Abher | Flutter ([Google Play](#) & [App Store](#))

- **A platform for booking sea trips and events, enabling users to explore and reserve boats, yachts, and marine activities.**
- **Connects clients with service providers who offer experiences such as fishing trips, private events, and sea adventures**
- **Enables users to browse available options, view details, and book experiences easily and efficiently**
- Developed a dual-platform application serving both **clients and service providers**
- Managed multiple app configurations using **flavors** for different environments

Coffee | Flutter ([Google Play](#))

- A food and beverage ordering app that allows users to browse and order **coffee, breakfast, and drinks**
- Supports multiple order options including **delivery, car pickup, and branch pickup**
- Provides a complete ordering experience from browsing products to placing orders and tracking their status.
- Integrated APIs for real-time order status and data synchronization

Personal Project

Ramzy Pharmacy | Flutter

- Built a full pharmacy management app (Ramzy Pharmacy) using Flutter & Node.js, improving inventory.
- Applied Clean Arch and Cubit for scalable state management across 15+ screens, accelerating development by 25%.
- Optimized performance via image caching and local database integration, cutting load times by 40% and ensuring seamless offline access.

Grabber | Flutter

- Built a delivery app for fresh produce and household goods with real-time tracking and status updates.
- Integrated Google Maps API with custom map styling for live routes, driver locations, and accurate ETAs.
- Designed smooth, custom animations and advanced controllers for a polished, responsive user experience.

EDUCATION

Mansoura University

Mansoura, Egypt

Bachelor's degree in computer and information science (Specialization: Software Engineering)

SKILLS

- Programming Languages:** Kotlin, Java, Dart.

Concepts: SOLID Principles, OOP, Design Patterns.

Networking: REST APIs, JSON Parsing, Error Handling.

Performance: Image Caching, Optimization Techniques.

Storage: SharedPreferences, Local Database.

Packages: Dio, http, shared_preferences, google_maps_flutter, permission_handler, go_router, easy_localization, pusher.

Soft Skills: Problem Solving, Team Collaboration, Communication, Time Management, Adaptability, Attention to Detail, Continuous Learning.
- Architecture:** Clean Architecture.

State Management: Bloc (Cubit), Familiar with Riverpod.

UI: Responsive Design, Pixel-perfect UI, Figma to Flutter.

Firebase: Cloud Firestore, Cloud Messaging.

Tools: Git, GitHub, GitLab, Postman, Hoppscotch.

LANGUAGES

Arabic (Native), English
